

Plakat - Decimale

Ovdje možete naći materijale za izradu plakata koji prikazuje koliko su velike desetinke, stotinke, tisućinke i desettisućinke, kako obojati 2.5748 kvadrata i gdje se na brojevnom pravcu nalazi broj 2.5748 .

Naime, kao što znamo, većina učenika je (i nakon svih naših pojašnjenja) uvjeren da su stotinke veće od desetinka, tisućinke veće od stotinka itd., a također im baš i nije jasno kako to da se broj 2.5748 na brojevnom pravcu nalazi između 2.5 i 2.6 .

Možda će ovakav plakat biti dodatni doprinos tome da te detalje bolje shvate i zapamte.

Ovdje ima i sličica koje su viška, no možda za nešto dobro dođu, za realizaciju neke druge ideje...
